

## SecureTrading Merchant Account Service

### The complete payment solution for trading online...

With the SecureTrading Merchant Account Service we can offer a complete solution for online trading – we help enable you to obtain an Internet Merchant ID (MID) and provide you with access to our first class Payment Gateway.

You want to trade on line. You want to accept credit cards and debit cards. The biggest hassle that you may face when starting out online is getting a Merchant Account from the bank. Through our network of acquirers, SecureTrading can save you time and effort and give you access to lower transaction rates.

And what's more, you'll normally get your money direct into your account within 7 days... (If you already have a Merchant account from your bank then the best product for you is the SecureTrading Payment Gateway).

#### Visa, MasterCard and more...

The standard offer includes acceptance facilities for Visa, MasterCard, American Express, Maestro, Solo and Visa Electron.

We are always adding new payment methods. You can also accept **PayPal** payments and **Ukash** (a method of paying for goods and services online with cash), giving your customers more ways to pay and giving you increased sales.

#### Flexible Reporting

If you want to find out how business is going simply use SecureTrading's reporting system, My-ST. This provides full details of all transactions and allows details to be downloaded into your own system for further analysis.

#### Reliable Service

With the SecureTrading Merchant Account Service there isn't just one payment system – there's a whole network... the most important feature of any payment solution is **reliability**. You don't want to have to turn business away. Because your transactions are processed through a network of payment servers, any of which can process your transaction your customers are never kept waiting, are never rejected.

SecureTrading has the best system availability record in the industry

## Quick Turnaround

It takes a matter of just seconds for transactions to be authorised. And with the SecureTrading Merchant Account Service, your money will be in the bank within days and all receipts can be easily reconciled using our superb transaction management tool, My-ST. What's more, payment pages can be fully customised to suit the profile and efficiency of your business.

## Virtual Terminal

Our Virtual Terminal is the ideal solution if you receive orders via telephone, fax or mail order. When you choose SecureTrading as your Payment Service Provider there is no extra charge for the Virtual Terminal and transactions are charged at your agreed rates.
