

SecureTrading Payment Gateway

Excellent service, value and security for your online transactions.

You want to trade on line. You want to accept credit cards and debit cards. You've made arrangements with your bank, or are in the process of doing so. The SecureTrading Payment Gateway is the product for you.

Using the very latest technology, we process - effectively and securely - all major credit and debit card payments in multiple currencies. (If you haven't got a Merchant Account with your bank we can arrange one with the SecureTrading Merchant Account Service).

Any Bank, any shopping cart

It doesn't matter which bank you want to use, SecureTrading will support them. We also support over 30 of the most popular shopping carts. Whatever your environment you'll find that SecureTrading will be able to help you with our onsite development team.

Simple Implementation

Connecting is a breeze – you can either:

- Use Payment Pages, where we take care of everything including the secure hosting of the checkout page, which can be customised to your requirements
- Talk to us over an XML interface using Xpay

Visa, MasterCard and more...

When you're up and running, you will be able to process Visa, MasterCard, American Express, Maestro, Solo and Visa Electron.

We are always adding new payment methods. You can also use your SecureTrading Payment Gateway to accept **PayPal** payments and **Ukash** (a method of paying for goods and services online with cash), giving your customers more ways to pay and giving you increased sales.

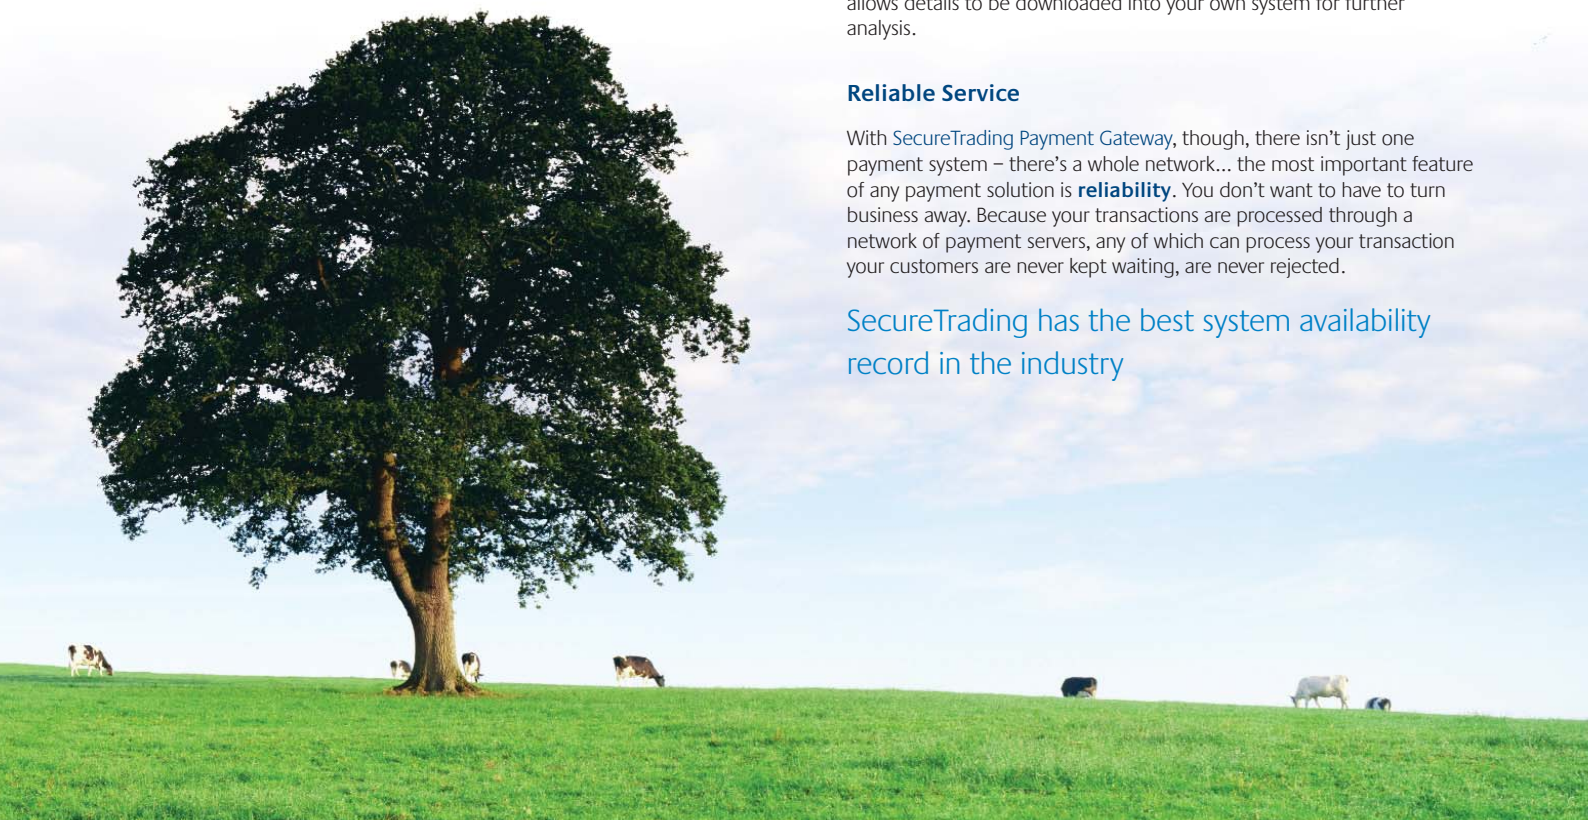

Flexible Reporting

If you want to find out how business is going simply use SecureTrading's reporting system, My-ST. This provides full details of all transactions and allows details to be downloaded into your own system for further analysis.

Reliable Service

With SecureTrading Payment Gateway, though, there isn't just one payment system – there's a whole network... the most important feature of any payment solution is **reliability**. You don't want to have to turn business away. Because your transactions are processed through a network of payment servers, any of which can process your transaction your customers are never kept waiting, are never rejected.

SecureTrading has the best system availability record in the industry

SecureTrading Payment Gateway

Quick Turnaround

It takes a matter of just seconds for transactions to be authorised. And with the SecureTrading Payment Gateway, your money will be in the bank within days and all receipts can be easily reconciled using My-ST. What's more, payment pages can be fully customised to suit the profile of your business.

Virtual Terminal

Our Virtual Terminal is the ideal solution if you receive orders via telephone, fax or mail order. When you choose SecureTrading as your Payment Service Provider there is no extra charge for the Virtual Terminal and transactions will be charged at your agreed rates.
